

# Star Mindset Task

Pupils should draw with a pencil between two parallel lines using a mirror reflection to see the paper.

Pupils cannot directly look at the star, they must start with one point then return all the way with pencil line reaching its starting point.

On completion use the Learning Zones PDF located on Active minds tab to discuss the decision making of which colour, size between lines and difficulty level chosen by the child.

Reflect on this and ask pupils after their actions what they would do next and use Learning wheel also located on active minds tab to frame next task.

Discuss process of tasks and the route to not completing yet or completing and setting new outcome goals.

# Star Mindset Task

Green	Level 1
Amber	Level 2
Red	Level 3
